

You might want to get a pen and some paper to keep notes as I go through this document, but you can also find it at ConfrontingTheCulture.com with live links.

***I walked in on my fiancé's suicide
and became the designated murder suspect.***

I was 25 years old.

I would later learn that he was involved in organized crime and that his business was likely a money laundering operation. Obviously, someone thought I knew something and wanted to make sure that I was scared into retreat or put away.

There came a moment in this nightmare when I remembered having several meaningful encounters with God while I was very young. My dad was a pastor, so God was a common topic, and I was in a spiritual place (church) several times a week, so spiritual stuff happened to me. I read the Bible from cover to cover at 7 years old when it came as a birthday gift. It's still on my bookshelf today. I had a PROFOUND spiritual experience at 9, without anyone around me coaching me into anything. I never shared it with anyone. I don't think I knew how to explain it and I didn't think the adults would have the right answers, so I just tucked it away, but it left me with the full awareness that GOD IS REAL, not knowing how much I would need that insight later in life. From where I am now, I'd say these were all intended life experiences to help me accomplish a very difficult purpose as an adult.

I was about 11 when Dad left the ministry for a secular job, church attendance dwindled to major holidays only and eventually we stopped going. In a few years my parents divorced, and we all carried on with our now fractured lives and all three kids went into the errors of the 70s' culture.

I hadn't even thought of God in over a decade, UNTIL NOW.

I fell on my face and offered Him a deal and a few months later at my arraignment, I saw His hand move the world in my favor in a profound way when I was exonerated by Judge Myron Love.

Yep, Judge Love set me free.

It was this experience that let me know that God could hear me, see me, and would still respond to me despite my long absence...

SO, I CHASED HIM!

How could I not?

The priority of my life became hearing Him speak to me. It took six years of crying out every waking moment for this gift to evolve.

"Talk to me. I can't help You on this planet if I can't hear You. I NEED You to speak to me..."

not realizing that when I did begin hearing Divine Guidance,

that it would put me at odds with the entire culture,

especially the church crowd.

I was now listening to God and the entire world around me was listening to other humans and adopting their ideas.

I tried reading the Bible but just couldn't connect with it and felt it was more important to HEAR GOD speak, "We can always do the Bible study part later" was my thinking... I NEEDED to see God's hand move the world again more than I needed to know scripture; at least that was my thinking. All fell quiet so I fell in love and married a man who exceeded my dreams, and we soon were expecting our first child. I had some health challenges during the pregnancy, but nothing seemed extreme, and she was born healthy. After her birth concerning symptoms began to present in me. We'd begun attending church, so I did what other Christians did and went forward for prayer for healing. The standard prayer throughout most churches sounds like this, "Father we bring Kathy before you today and we ask that you bless the doctors with wisdom and knowledge in their diagnosis and treatment of her and it's in the mighty name of Jesus we pray.

Amen".

So, like everyone else, I began seeing doctors, 11 of them in 18 months, several of whom were "specialists" in their field of study. What was odd is they all seemed to act like one part of the body had nothing to do with another part and what answers they did present seemed to conveniently let them off the hook for having to know what was wrong with me. "It's your genetics" or "it just happens to some people" or "your body is attacking itself". I was given a diagnosis of "infertility" with a 9-month-old standing between my knees. I found it odd that the doctor seemed agitated when I asked her, "What happened? I was fine 18 months ago."

I learned that genes are only a potential to acquire a trait or disease but then I learned, from reading books that matter, that genes REQUIRE a trigger but the doctors seemed to either not know this or didn't want to explore "triggers" so there isn't much chance of them finding the cause. None of them asked about my eating or lifestyle habits, no questions about my environment, or whether I was in and around healthy relationships. Never did I hear one say, "I simply don't know" and none of them were inclined to check out other factors. I found ridiculous explanations and no answers so by the time 18 months elapsed I was worse, much worse. They had subjected me to more stress, gave me Rx medications that didn't help and caused other issues, and ultimately didn't address the cause so it remained and continued doing its damage.

The church people seemed annoyed that I wasn't getting well when they prayed for me and decided that I must have "hidden sin" that prevented God's mercy from healing me or that I "didn't have enough faith to accept the biblically promised healing". They acted like everyone was getting well except for me when that wasn't the case at all. RARELY is how often healing testimonials were shared and if someone gave one, a few months would elapse, and they'd be right back at the altar seeking healing prayer again. After God got a hold of me, I was able to see that this was most likely because they ignored the scriptural teaching where Jesus said often after healing someone, "Go and sin no more or something worse may come upon you." He was acknowledging that we can and do have a part to play in maintaining our health and learning why we got sick, so we don't reflect the attitude in a verse in Proverbs,

"Like a dog returns to his vomit, so does a fool return to their folly."

If we don't identify the cause and fix it,

sickness will likely, logically, and probably come back on us.

Sadly, nobody wanted to admit that people weren't getting well from these culturally accepted ideas and that we might need to review our sources, practices, and principles being relied upon, and they resented me for revealing the flaws in their ideas.

Once I finally realized that the medical and religious groups didn't have my answers, again,
I CHASED GOD DOWN.

I began this approach by calling and cancelling all pending medical tests and the follow-up appointments and slid down the wall crying. It was a cry of surrender as I declared, "It's me and You God and if this doesn't work, I'm coming Home early and You're going to have a PR problem as I leave behind a husband and young child. I'm listening and will follow where You lead but I must know that it's You, so I need to hear You. I'm done assuming that humans have my answers. If You send me to a doctor, then my follow through would be an act of obedience. If I seek them on my own, that is an indication that my faith is in human ideas more than in You.

Fortunately, there was a forgotten experience at 21 years old that was lying dormant but certainly influencing me. It was when a grand mal seizure threatened my freedom (my driver's license) and mainstream doctors in literal "Ivory Towers" didn't have the answers but a back woods doctor who practiced medicine in a nearby small town knew and gave me back my life. Like many humans, I didn't stay in learning mode and then wandered from the path he'd begun with me and ended up subjecting my body to more "poisons" at the hands of "medical" practitioners. This time, at 30 years old, God seemed intent on making sure I didn't leave the classroom, so I'll encourage you strongly to enter and not leave as well. I could've avoided a lot of error had I parked myself at this doctor's feet and is actually a true "life regret" as I'm certain he would've taught me everything he knew.

After praying that prayer God was quiet for six long months. I grew worse but I didn't change my commitment to waiting for Him and Him alone to tell me what was wrong, what to do, and what I needed to learn AND APPLY.

Another young couple down the road gave birth to their first child shortly before our baby was born. It was a stillborn son and none of us living nearby saw the warning revealed, which was large and obvious and about 75 yards from their home and 250 yards from ours, an electric substation. We aren't trained to see these things and have instead yielded our trust and responsibility to industries that aren't inspired to do so including "stewards", political and spiritual, who have facilitated this yielding because we all forgot an important biblical warning:

"Behold I send you in as sheep among wolves.

Be ye therefore wise as a serpent, harmless as a dove."

We have not done the "wise as a serpent" part very well and thereby have done quite a bit of damage just by making foolishness (the absence of wisdom) acceptable among us.

One of the first things God did to help me...

He turned me into a reader of books until I had 5 or 6 at a time going,
which inspired diet and lifestyle changes as I learned more and more.

I had to be part of the solution, or His part wouldn't matter, or wouldn't last.

<https://gettingwellgodsway.com/2021/01/29/gods-part-in-your-health-recovery-and-your-part/>

**Once I broke free from the delusion that a pastor or doctor was going to heal me
and chased God down for guidance,**

I was able to reverse my reportedly "incurable" diseases such as my Hashimoto's Autoimmune Disease and successfully ditched the 90 mg's of Rx thyroid medication they said I'd be on for
the rest of my life.

The Advanced Cervical Degenerative Disc Disease they said would fuse my neck vertebra by 1993
never happened and the disabling inflammation episodes known as "fibromyalgia" are understood
and I don't do what triggers them now.

As it turned out these conditions weren't "incurable" but the mainstream, Rx-writing doctors just
didn't know how because they're taught to sell drugs, not to actually cure anything.

I then broke my spine in July of 1994 when I fell from a bridge into a shallow river while cycling with a friend. This event was noted in a journal 9 months earlier though I didn't understand it fully until the event happened.

The x-rays showed that I was paralyzed from the waist down, but God had other plans. A friend who lived 3 hours away felt strongly encouraged to come visit the night before, even leaving an event at her home she'd planned for a year.

She just happened to be trained in first aid and recently finished a course on "Water rescue with an emphasis on potential back injury".

How does He do this?

Let me preface this next part by writing that I'm going to have to fuss at the church crowd here, but I also want you to know that the attitudes I'm going to address exist because we live in a fallen world and a ton of money and time has been spent to make us think and behave the way we do.

"The health of the flock is a reflection of the shepherds' faithfulness."

Henry Blackaby, *Experiencing God*

I still wonder why the pastors didn't do what I did when they saw their congregants becoming sickly and no healings happening in the churches.

Why didn't they chase God down like I did?

I headed off into my years of reading and changed my lifestyle over and over as I learned more and more, praying for continued guidance and seeing immediate improvements to my health. Sadly, when I tried to share what God was teaching me the church people made it very clear that they weren't interested. There weren't any extremes suggested; just that Coke machines and chemically-laden junk food, and prayers that only acknowledge a Rx-writing doctor didn't belong in a true church.

Nope

They had their "ways", and they liked them.

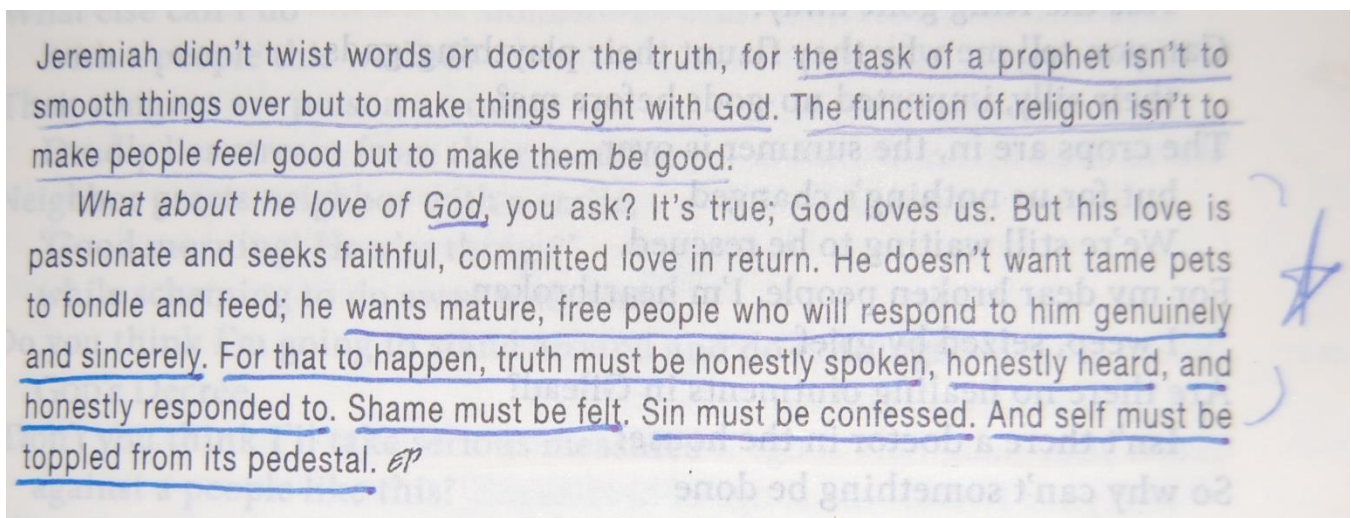

They weren't even interested in what wisdom dictated.

Not interested in any ideas that meant they would need to become informed participants in getting well and staying well especially if it was going to mean they had to deny themselves any indulgence.

Frankly, it was shocking to see and experience.

Below is a meaningful quote from a favorite bible...

Be advised I do not call myself a prophet...I'm okay with "messenger" or "watchman"
But the spirit of the message is right on regarding this role of carrying warnings to the culture...

The way they responded to me helped to weaken my marriage and damaged my credibility with my child who ultimately declared, "I want to be like them" and she didn't mean "closer to God". She was saying "free to do what I please with little to no regard for what God wants, what the Bible teaches, or its effect on my health or the culture".

A big regret is that I didn't realize the extensive damage being done to us sooner and no, we didn't survive.

Today most people recognize the truth about food dyes, chemicals, and artificial sweeteners so I wasn't wrong and yet the Coke machines, junk food, and Rx doctor worship remains at what I now see as "false churches" and now many of them have added

cell towers on the property, in the steeple, or mounted on the front of the church with Wifi provided and everyone in the building has a cell phone on them.

I can't help but ask,

What part of Romans 12:2 "Be not conformed to this world" wasn't clear?

I continued my journey and was blessed with some coveted gifts along the way, but God told me they were for my own education and that I wasn't to tell the pastor about them or offer them in the church. God periodically brought someone along that I laid hands on in my home for 2 hours as if I was in a classroom until I began learning the lessons He wanted me to learn. What seemed most blatant was that most of their health issues were because of what they were eating, drinking, believing, and doing, and where they had placed their confidence, in humans instead of God and His ways.

When I'd share that they needed to learn what they were eating and drinking and steer away from manmade junk they'd look at me as if I'd lost my mind to suggest that they become an informed participant in the care of their "temple".

THIS is what's being produced by modern church attendance and that should sound an alarm!

I reconnected with a woman who'd been in my dad's church when I was a child and used the "gift" on her and a healing event took place in my living room that actually defied physics and shocked me so much that I backed off of offering the sessions realizing what this could do to the order of my life if this became known. I didn't want people showing up at my home all hours of the day and night insisting that I "Heal Them" or their child or...

"so they could return to the error that caused the issue in the first place".

I was now fully aware that people weren't willing to change, and I went into a deep depression for 3 weeks. Finally, I gained the courage to tell God, "Thank You very much for this gift but I don't want it. If people aren't willing to do their part to maintain any healing they receive, then I'm not willing to help them ignore Your wisdom and standards and take You and me for granted..."

The silence was broken a few days later when I heard Him say,

"Now you know how I feel".

And that moment is when I believe the book idea was born though it would be a few more years before God would make that known.

I can say with conviction that God responds to EFFORT and loathes laziness.

I've watched many good people pass away with tons of prayers being said because they weren't willing to change, or read a book, or pursue what they say they wanted.

They wanted "it" handed to them and He's not that kind of Father.

He will walk with us through our consequences but He's not likely to remove them.

HE LIKES EFFORT...lots of EFFORT just like any good parent.

Continuing,

It was the broken back event that caused me to start writing the book. God told me He wanted me to write it in June of 1992. Two years later I hadn't written one word because I'd already learned that the church people weren't willing to hear or heed and felt it would threaten my marriage for reasons I couldn't articulate.

I worked on the book for 16 years of our marriage and he never mentioned it once.

I expected he'd get over that at some point.

Instead, he started drinking heavily with coworkers in his out-of-town all-week job and I never got to see that ending to this story.

I'd already begun to silently mourn before the divorce when it became clear that if I was going to finish this book and whatever it produced, I was going to have to give up my husband, my daughter, and my new grandbaby I'd cared for heavily for the first 19 months of her life. I was doing this while I was resented and unappreciated and facing a health crisis due to mold exposure which created massive systemic inflammation AGAIN. Not being one to take Rx drugs it deepened my suffering while I was also feeling a \$150,000 financial business loss in the 2008 crash, a business that finally brought me respect, accolades, and deeper spiritual experiences.

It became clear that everything I loved was going to be surrendered to continue the calling.

Over time, everyone and everything that stood in the way of the book,
or didn't support its creation, was taken from my life.

While I see why this was necessary, it broke me deeply for over a decade, but I kept typing.

Clearly, God had a "take no prisoners" mindset and after all, I had made Him an "open-ended" deal; my future for His presence, so I had no choice.

What's Possible?

Well, I haven't been to a mainstream medical doctor for illness since 1990.

I was taught how to "possess your vessel in sanctification and honor"
as First Thessalonians 4:5 puts it.

Or in my words, "so you'll know how to take care of your body and not be humiliated, dishonored
and financially drained in the process of overcoming disease".

While I'm very grateful for the trauma skills of mainstream medicine,
when it comes to restoring health, they have an unacceptable track record
with methods that defy basic common sense, can and do harm,
and financial goals that conflict with what's best for the patient.

Rx drugs are not vitamins

and most health

issues are due to nutrient deficiencies,

toxic overload, toxic relationships,

and these days, the environment, (chemical and electrical).

Rx drugs address none of that!

None!

The consumer is the most powerful force on the planet

and when a majority of them are supporting wrong ideas, wrong products,
wrong mentors, and wrong systems the world ends up looking like our world currently looks.

Hopefully when we know better, we'll do better

and therein lies my mission.

Stay With Me Now...you're about to see the Hand of God again!

A few days after I uploaded the book on Amazon.com another providential event happened.

A woman contacted me who'd just received the book.

"I stuck my thumbnail in a random place and my eyes fell on the name of Dr. Tenpenny.
Does she know she's in your book...she's about to, she's my neighbor and my doctor."
I laughed and said, "Well that would be God's doing. I put Him in charge of marketing."

I then explained that becoming its author had ripped my life apart
and how I didn't want to write it...

"When I finished it, I held my laptop up toward Heaven and told God '
Here's the book I'm pretty sure You asked for.
I don't know what happens with a book from this point, but I'm emptied out.
I'm exhausted, I'm broke, and honestly, I'm a little angry.
So, You're going to have to take it from here..."

This call made it apparent that He did!
In a few months this world-renowned medical doctor introduced me on a
nationally syndicated radio show.
You can listen to that interview here:

<https://gettingwellgodsway.com/2015/09/23/archived-audio-from-interview-on-the-robert-scott-bell-show/>

I then received a private message from a woman reporting that she'd had a miraculous healing while reading the book. "I took a page out of your playbook and...". I put her story and supporting screenshots on the GettingWellGodsWay.com book blog..."reader has supernatural healing..."
<https://gettingwellgodsway.com/2018/02/04/reader-has-supernatural-healing-reading-the-book/>

Then another woman reached out..." I don't know how to eat for my condition" of Rheumatoid Arthritis". I suggested she "Tell God what you just told me and ask for His guidance and then wait to see what happens." She wrote to me a few hours later in tears telling me that she'd done that and then went to the grocery store and a Hispanic woman stepped out in front of her and said, "God sent me to show you how to eat" and she walked her through the entire store showing her what to eat and what not to eat infusing bible verses where appropriate.
She was very active in church and friends with the pastors and leadership but had no awareness that God would engage with her in this way.

Then a woman in Australia who heard the Dr. Tenpenny broadcast reached out through facebook private message and I emailed her the book introduction which she read and then read to her husband. He wanted to talk to me by Skype, so we set it up and halfway through the 3-hour call

he said, "I have to tell you that about ten minutes after we started talking, I started crying and I haven't been able to stop. When you speak, I hear God talking and I haven't heard Him in a very long time." He continued sniffing for the remainder of the call. Then another man reached out and bought 50 copies of the book to pass out around his town in Maryland. At the end of the call,

he too began crying and said,

"You're a messenger sent by God and if we don't listen to you, we deserve what happens to us next."

Another woman reached out, "Reading, reading, reading your book and wondering why it isn't mandatory reading for all".

A woman I worked with bought the book and her husband approached me at a birthday party sharing that he was waiting for her to come home from work and picked up the book and began reading the introduction.

"When Desiree came home, she found me on my knees in the living room in tears. You're right!" The next one was a man I met in the grocery store who ended up coming over to me as if I was wearing a sign of some sort. He ended up following me to my truck and bought a book from me. About six weeks later we spoke on the phone, and he too began crying. He's an electrical engineer and when he read what I'd written about our electrical world he said,

"We've overlooked something very important and now to be frank, I'm scared".

I didn't relieve him of his concern...I replied, "...you should be scared...".

My phone was going crazy with notifications and the race was on!

Again, this is what can happen when you give God room to be God!

This was when I knew the book was an important work!

But then...something happened that changed all of that!

What you should know about me now:

If it's not already obvious, little happens "randomly" in my life.

Everything is God making me live out "that deal" and using my life to teach others.

Based on the content of the book, He's big on trying to help humanity see what they need to see and He had one more HUGE insight to share after the book came out, so it got an update!

If you're looking at this online, please be aware that you don't have to open every link

I'll provide here! If you're reading a printed copy of this, you can later go online to ConfrontingTheCulture.com to open this document and the given links.

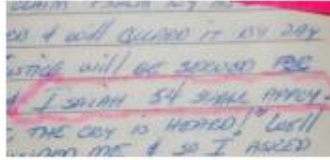

What Happened After the Book Came Out!

The book had been out about 18 months when I began having some unusual symptoms and couldn't figure out the source until I upgraded my cell phone and noticed my hands ached when I held it. A few weeks later I touched the screen of my mom's cell phone, and a pain shot up my arm that radically changed the focus and the location of our lives. Fortunately, the previous years, the book I'd written, and my online connections with other health hackers, had laid a great foundation for God to continue guiding me through these now, much more treacherous waters.

We moved away from the technology-dense city of Austin, Texas to the dense forest of the Ozarks in NW Arkansas, where we live deep down in a hollow with no cell service on purpose.

*Of interest, me being "moved here" was noted in a first adult journal on **May 27th, 1990**. When God did begin speaking to me I began keeping a journal. About 10 pages into the first one I wrote, "**Isaiah 54 shall apply**" referring to a message given to my now ex after I lost a lawsuit with the dirty lawyer in my murder charge. It left him perplexed and angry, so I suggested he go spend some time with God on his family's rural land and he came back saying "God says we should read Isaiah 54" and here I am 33 years later (Feb 2023), when a poem forced its way into existence to show me the sovereignty of God.*

The Itinerary of a Surrendered Life

May 27th, 1990, A.D.

I wrote down a message GOD spoke to me.

"Isaiah 54 Shall Apply" is what it read.

I noted it in a first adult journal and then I went to bed.

28 years went by before someone brought this back to mind.

When I went back to read it, I was amazed by what I'd find.

It was like reading a story of where all I had been.

It even showed my divorce, which I didn't see back then.

I remembered the idea that "I would be moved to a place with a gemstone foundation".

NOW, I know I'd be led to awaken people to a dangerous situation.

I had sought to live a PURPOSED LIFE seeking God's presence every day.

So He could tell us a story and help us find His way.

It's been a challenging but fruitful journey, an alternative path I took.

God then insisted I write an extensive book.

It had been out about a year when the story took a radical turn.

There were urgent things He needed to show me – we have a lot to learn.

Our launch of massive technology is the subject that's caught His eye.

If we don't stop this a lot more things will die!

As it turns out as we arrive at 2023, I found myself thinking about May 27th, 1990, A.D.

How I'm exactly where that chapter in Isaiah said that I would be.

I enjoy looking for God in my story as it assures this isn't "just me".

First thing I notice in 2023, is that journal entry is turning 33.

Realizing this year, 66 years I've been livin'

But realized too I wasn't actually 33 when it was given.

"But wait a minute" my mind ran ahead.

"How many days between those two?" I said.

I could hardly believe the answer when it was shown to me.

3 weeks and 3 days later I turned 33.

One step further, as I look around.

Another set of 3's is what I found.

February 2023 helps me to know.

We arrived here 3 years and 3 months ago.

I can't believe my eyes as I look across the nations.

And see the boundless destruction caused by corporations.

Think of the seeding birds, the flora, and the bee

Living without them is a life we don't wanna see.

So, when I say "I've been sent" to help you see the error in humanity's direction.

I hope you too can see the thumbprint of God and know the information comes with deep affection.

Before I go, I just have one question.

What will it take before WE THE PEOPLE respond, does this need to be an even bigger lesson?

TheTruthAboutTechnology.org

Again, how does He do that?

Well, YOU have to get on the same page He is about matters of your life.

You have to start seeking and yielding to His will for your life more than your own plans.

I hope to teach and inspire others on how to get there faster than I did because the world needs more conscious people!

So,

We arrived in the Ozarks of NW Arkansas in November of 2019.

At this time, I was still under the impression that I was a "rare duck" having this condition I'd come to know as "electromagnetic hypersensitivity" or EHS.

One month after our arrival,

December of 2019, the local Sheriff's 46-year-old happy healthy wife dropped dead from a heart attack!

My eyebrows were raised but we'd just arrived, so I did nothing.

The next winter, December of 2020, another local woman, 60 years old, whose family owns the hardware store and building that contains the grocery store was found crawling on the floor and didn't know who she was.

They found several masses on the side of her brain, and she died three weeks later. That's when I took readings in the electric outlet that was abnormally high up on the wall by her desk, even with her head and saw the reality about what's going on here.

Safe line noise readings are 20-30.

The Stetzerizer line noise meter reading started in the 1500's, jumped to the 1900's, then exceeded the limits of the meter, so over 2000 GSU's!

I found them in many buildings around town.

The Road Superintendent borrowed the meter and found them in the courthouse and "...every building I checked".

I created a 2-page document with active links on the NoATT.blog site and passed them out in 20-degree weather fueled by Lisa's death.

Little to nothing came of that effort.

December of 2021 came, and another healthy, happy 54-yr-old dropped dead of a heart attack. She worked in the same building as Lisa (death #2).

I expanded the document to 5 pages and put 100 of them in the door handle of every car in store parking lots for weeks...again, not much came of it other than small talk.

It took a while for me to see that while others don't feel it like I do, they are being adversely affected, it just has different disease names.

I've spent 5 years here writing, calling, and begging
for resolutions from local, state, and federal level politicians, environmental groups,
notified every member of the state board of health and the Newton Country Health Department,
Arkansas Electric Cooperatives Assoc, law firms, Game & Fish Commission, Arkansas Fair Housing,
HUD, the EPA, FCC, Arkansas Public Service Commissioners, Disability Rights, DOJ, DOE,
Office of Electricity at the federal level...

NOBODY WILL MOVE AGAINST ANY TECHNOLOGY

and at the federal level jurisdiction has been pulled from every oversight agency!

***That means they sent the sheriff's home so there's nobody to report the crime to
as they continue rolling out a historic number of sources just in towers and satellites!***

When we fled Austin, Texas we had 23 cell towers and 112 antennas in a 4-mile radius of our
home. Today, five years later, there are 41 cell towers and 133 antennas in a 3-mile radius.

AntennaSearch.com shows 192 towers and 1130 antennas in a 3-mile radius of 100 Congress Ave,
Austin, Texas 78704.

Another friend had 443 cell towers and 339 antennas around her San Antonio, Texas home in
2018.

Now it shows 849 cell towers and 261 antennas
in a 3-mile radius.

[https://neighborsorganizingagainsttrespassingtechnology.blog/2024/09/22/849-cell-towers-265-
antennas-in-a-3-mile-radius/](https://neighborsorganizingagainsttrespassingtechnology.blog/2024/09/22/849-cell-towers-265-antennas-in-a-3-mile-radius/)

If you think this is about making a phone call, you need to think again!

**From what I can gather this agenda isn't an accident but rather intentional genocide
traced back to "declarations of intent" by elite families in art and literature dating back to
the 1500's revealed by a Youtube video guest!**

They intend to replace humanity with silicon beings.

You'll find a 1.5 hour video on the NoATT.blog site titled:

"90% of Humans Gone by 2029"

I no longer own a cell phone and can't and won't be around them.

We have a copper landline and use only corded phones.

We ALL should DEMAND a copper land line BECAUSE the FCC got sued and lost.

"The Irregulars" are a group of lawyers who came out of retirement to sue them

And discovered they had moved money for copper lines into the telecom industry

And made it look like the copper landlines were losing money in order to advance

Agendas. Each state now has millions of dollars available,

but they have to go ask for it:

<https://neighborsorganizingagainsttrespassingtechnology.blog/2023/06/27/lawyers-freed-the-states-from-the-fcc-but-do-the-states-know-this/>

I work from a hardwired, grounded, shielded personal computer.

I have a blue light screen blocker on every screen in the home,

including our hard-wired Roku-enabled televisions.

We have a \$1500 filter on the electric panel, which filters undesirable current

from these not smart electric meters, and a plug-in version,

about one per room, to filter inside the home issues.

We only use incandescent, halogen, or "healthy" light bulbs.

I created an extensive post that can help you sort some things out:

How to Tame Your Wireless World!

<https://neighborsorganizingagainsttrespassingtechnology.blog/2025/02/11/how-to-tame-your-wireless-world/>

Nutritional supplements have also saved my life, and I've kept the book

updated with all of these efforts, what I use, and where I get it.

At this time, I think there's only 1 or 2 affiliate codes

as that has not been my focus.

full disclosure:

If you decide to buy a SATIC whole house filter or other SATIC products

using my affiliate code I will earn a commission.

"Making money" when I see what I see, feels like I'm busy selling floatation devices on the

Titanic, a bit predatory and yet YES, I do need financial support to continue.

Buying the book, reading it, and applying what you're shown is a great starting point.

I tend to survive every calamity and my efforts of building a safe haven community for those of us suffering is the final agenda, so I need support to make that happen, emotionally, financially, spiritually and tangibly.

Currently, I'm about to be a 68-year-old woman living on social security, paying for all the sites, domains, printings, and trainings so it's a bit much.

Solutions

I created a non-commercial SOLUTIONS category on the NoATT.blog to help you and you can also go to LessEMF.com and request a paper catalogue for free that will give you quite a bit of information. Get 5 and share them with others.

They've been in business for 26+ years, and nobody thought of telling us we needed to be shielding our body using the products they sell? Hmmmmm

Safe Living Technologies is another provider, but LessEMF has the paper catalogue that will teach you a lot about this stuff just by thumbing through it.

My book also contains a lot of information, and I didn't put every supplement I take or what I do on the site due to what is often pure overwhelm as I currently live in an environment with a 24/7 high-pitched screeching noise and have been trying to survive the journey, but it's in the book.

Turns out, there's a reason they put electric current in insulated wires!

We are energetic beings.

Our entire world is made up of electrical and magnetic energy of a much different form than what's being pumped out today by profiteers.

Nature's waves are smooth, and they flow.

These manmade waves are pulsed, modulated, and essentially corrupted.

Because we are energetic beings in an energetic eco system that sustains us we're effectively pooping in the soup pot we're going to eat from.

Outdoors is our food basket in every way, shape and form, even beyond most people's awareness!

If we destroy the environment with technology...apocalyptic will be a reality.

In fact, many experts are predicting a 6th self-extinction event from our technology deployment.

This will be the first one created by human activity.

When you go to TheTruthAboutTechnology.org and see and look at the IMAGES THAT TEACH category, you're going to see what the media that sells ads for the stuff won't show you!

It's beyond ignorance!

You'll find a book on Amazon titled Electric Ecosystem

that explains this quite well at this shortened link:

<https://tinyurl.com/25xc9nvh>

Here's some basics:

First, this condition is known as "electromagnetic hypersensitivity" or EHS.

It's also known as "Radio Wave Sickness" which was easily recognized after WWII.

It's also known as "Microwave Sickness" and even

the "Yuppie Flu" back in the early 90's as it affected mostly

young urban professionals known as "Yuppies"

who were on their phones and computers a lot.

**The Nat'l Institute of Environmental Health Sciences calls this a
"world wide plague that began when technology was launched at an industrial level".**

They estimate 1/3 of the population in the USA is affected.

Other experts estimated 50% of the population would be adversely affected by 2017.

"Prevalence of EHS occurrence is estimated to range from 0.7% to 13.3%, mainly affecting about

3% to 5% of the population in many countries, meaning that millions of people may in fact be affected by EHS worldwide... the increase in EHS prevalence is not restricted to a single country but is presently a worldwide plague, which started as soon as these industrial technologies

became widespread."

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7139347/?fbclid=IwAR1DrLjrNI-Am9mUaaq-8MiGyL7pAPI_y8SJDMpi635548J6MP0IhrsXFgQ

There's Int'l Insurance Billing Codes for the condition known as **ICD Codes**.

If there's an insurance billing code, with physical symptoms associated,

then it's not a psychological issue or mental illness.

You'll find the codes in the right-hand column of

TheTruthAboutTechnology.org

The W.H.O. calls it "Idiopathic Intolerance to the presence of electromagnetic fields".
To me that says, "We aren't sick, the environment is sick. We're just the ones who feel it."

Kathy, why don't we all feel it?

God, in His infinite wisdom, created 15-20% of every species to be more vulnerable.

We are the early warning messengers that the environment is out of balance.

Consumers need to realize the tel-lie-vision sells advertising
to the purveyors of the toxin so they aren't going to tell you about those of us suffering
and what's happening to the animals, or the ecosystem.

There's a 6-minute video showing what a group of cell towers,
in the distance, are doing to some farm animals.

I couldn't finish watching it.

THIS IS EVIL we're dealing with.

Pure evil.

If you think I'm being extreme, go watch it:

It's on the NoATT.blog site titled (click on the blue words)

[Cell Towers Maiming and Killing Animals](#)

Another culprit in this story is likely the CCP aka Chinese Communist Party
who owns a lot of Hollywood, media, technology, and our politician gatekeepers.

They are using media to spread misinformation, and it's working!

Better Call Saul was a Netflix series intended to make viewers believe that anyone who claims to
feel "their phone" is a nut case.

If this is your source of information, you've been "programmed".

It seems clear to me that the CCP was involved in the safety certification of this not smart electric meter system here where the claim is that "these meters meet ANSI standards". ANSI is the American National Standards Institute, a safety certification mill that was overseen by a CCP member from 2015-2021 so essentially Communist China is certifying the safety of the electric meters here that were "banned in two countries at the federal level by the Austrian Chamber of Physicians and the Swiss Physicians for the Environment for fear that they are deadly with immediate and cumulative effects with the most vulnerable feeling it the soonest".

There are now 9 of us "most vulnerable" that I'm aware of living in this town of 500 people.

<https://neighborsorganizingagainsttrespassingtechnology.blog/2023/10/23/when-the-safety-accreditation-bodies-are-corrupt/>

**CCP satellites were identified starting the fires in Maui,
"with or without participation of the USA"
is the lingering question.**

You can view the 4-minute video that confirms this at NoATT.blog: [CCP Satellites Over Maui](#) apparently moving forward with the roll out of "15-minute cities" in the USA and could even be describing "freedom cities" mentioned by Trump. They will be completely controlled by technocratic methods akin to global Communism would be my expectation with a heavy AI presence for enforcement is the long game goal.

A lot of "doe-eyed" millennials raised with a phone in their hand have little clue what their future holds...if they even have one.

On the NoATT.blog site you'll find a post titled: [A recently leaked database has revealed that 1.95 million registered members of the Chinese Communist Party \(CCP\) have been employed at universities, major corporations, and British consulates around the world.](#)

**That post contains a link showing that the electric meters are in fact
"Surveillance Capitalism" devices.**

**You'll also find these not smart electric meters are heavily implicated in the recent fires
where homes burn but trees do not and other anomalies.**

<https://neighborsorganizingagainsttrespassingtechnology.blog/category/technology-wildfires/>

so we need to create a WE THE PEOPLE action to change this!

FYI you can still buy an old-style analog watt hour meter on eBay.com for \$25-\$40.

I keep asking "who gives a foreign adversary access to their electric grid or allows them
air space with satellites comprised of high-powered lasers"?

Compromised, greedy, ego-driven, power-hungry, delusional humans,
many of whom actually profess to be "Christian" politicians who attend church regularly
while denying mercy and justice to their own constituents
because CORPORATIONS are bigger donors.

So please don't let a tel-lie-vision turn you into a stooge for nefarious agendas!

Reading books that matter is spiritual warfare!

They reveal truth not in the mainstream and is one of the
ways my spiritual life became very active.

I was not a reader of books until I chased God down
and it just happened, incessant reading...one led to another to six at a time.

It makes sense that "God" would have a hard time finding a purpose for a uninformed person
but evil sure doesn't.

In fact, being ignorant is a prerequisite to evil and from what I can tell, our country now looks
like a whole bunch of the citizenry stopped self-educating and thereby lapsed into
A very dangerous level of accepting ideas without considering them fully.

You need to recognize that Wisdom and Knowledge are not inclined to come rub your feet
while appealing with you to make better decisions in life.

I, and the information I have created for you may be the closest thing to that happening.
I'm personally interested in connecting with people who truly want to save the world, or at
least their own life and that of a few deserving friends and family members!

I doubt many will find their life purpose if they aren't reading and seeking, and they damn sure won't be prepared for the spiritual battle going on in this modern world.

For those who aren't clear, THE COSMIC GAME has escalated recently
and these cell phones have everyone under a spell.

It's as if the entire world has taken up chain smoking while ignoring those of us injured or made ill...as if this technology has always been around and we're just whiny sickly people. Wait until you see how many were "perfectly fine" until a not smart meter was put on their home/office or they upgraded their phone and suddenly they were no longer fine!

You need to realize

there are no ancient cell towers with microwave drums mounted on them.

You know little to nothing about these new digital/electronic utility meters
stuck on the wiring of almost every building with electric service.

The one in use here they FORCED on the customers in the Arkansas Ozarks...well

The FCC released a video and 3 pdf's showing that it

"contaminates the power lines"

and yet...here it is!

In the right-hand column of TheTruthAboutTechnology.org site you can view the [FCC Lab video 7.5 minutes](#) demonstrating this and the 3-part pdf explaining this is just below that listing. So, if the FCC isn't in favor of it....HOW DID IT GET PLACED IN OUR WORLD?

Who's controlling the FCC or overriding them?

It has the entire Ozarks screaming with a 24/7 squeal the locals say began upon installation. According to EMF mitigation experts this is due to a data signal being carried on an electric line only designed to carry current and the data signal apparently has an inherent whine.

Five years of effort to have this addressed here in the Ozarks
of NW Arkansas seems to have failed.

I even found a 70-yr-old Chief Electrical Inspector for the state who said adamantly,

"If y'all are hearing a squeal, that means there's a problem up there".

He tried twice to get someone to come check on us.

As he was retiring, he finally showed agitation and gave up the name of the man he asked to come.

Randy Hooten!

Who is Randy Hooten of Carroll Electric Cooperative Corporation and why didn't he come check on us when a state level electrical inspector asked him to...TWICE?

It's like I've discovered a bad secret, and nobody wants to "be the one" to call out the guilty parties, because they're all going to look stupid or evil. They're willing to let people, animals, the eco system...be sickened, injured, and killed to preserve the perception that all is well.

No, it isn't!

And unless your doctor/practitioner is AWARE they will misdiagnose patients, subject them to injurious testing and return them to their unhealthy electrical environment.

In fact, I was heavily considering the launch of the podcast recently and was contacted by a medical doctor who zealously wanted to participate.

He's a Pediatrician, a Pediatric Neurologist, a Sleep Specialist, and studied Physics (self-funded) for 14 years to understand how these EMF's (electromagnetic fields) were affecting his young patients. Many parents began reporting their child was "playing with the Wi gaming device" when they had a seizure.

He closed his practice and began measuring and mitigating his patient's environment instead of giving out Rx pills.

Frankly, I don't see how it's possible to get an accurate lab test on patients when their blood is altered by exposure to these not smart electric meters alone, never mind the cumulative mess:

You'll find a 3-minute video on NoATT.blog titled:

[Show Me the Blood Affected by Not Smart Electric Meters](#)

I've also seen people given the "all clear" status from their doctor when they were being cooked by exposure to their cell phone.

One reader who had already hardwired her computer and changed her electric meter to an old-style analog was getting sicker every day. This began 3 weeks after she upgraded her phone, like so many of us. *Doctors were running all kinds of tests and found nothing.*

I challenged her to turn her phone OFF, not airplane mode,
which allows some emitters to continue pushing out toxic current...
Her husband's phone was to be outside if on...no smart watches around...for 3 days...
don't get in someone's late model car who may have GPS or a phone...
for 3 days and 7 days would be better!"

NO WIRELESS in her presence and in 48 hours her health did a complete turn around.

Why 3 days?

**Because several non-verbal kids began speaking after
they were removed from a wireless environment for 3 days!**

You'll find a post on the NoATT.blog titled: [Non-Verbal Kids Began Speaking](#)

Another disturbing story is about the **4 babies born without hands** after a 5G tower
went up in Germany and another one about 30 calves born blind...

NoATT.blog & TTAT site: [4 Babies Born Without Hands, 30 Calves Born Blind & more](#)

Only after my own injury did I recall that young mom who gave birth to the stillborn son and
I could then see that three other women were being adversely affected by that electric
substation, all with female reproductive issues.

We've known since the 70's that children were getting leukemia from
power lines across school property and yet... our govt stewards continue to not apply the
knowledge specifically to protect corporate interests and shareholders?

How far are we willing to let this go?

Seems like "taxation without representation" to me!

For me, this was a cumulative condition that led to an acute event and it is accumulating in more
and more people and will likely continue to do so.

I was the right genetic makeup, I just needed a trigger to set dis-ease in motion.

Mercury amalgam dental fillings and eating and drinking in accordance with the
stupid CULture, didn't help!

Over time, my body was becoming overloaded with free radicals from
chronic exposure to "electromagnetic field radiation".

When those "free radical" aka "oxidative stress" levels hit a certain saturation level, BOOM!
My entire electrical system got hit and my very life was under threat by this invisible toxin
everyone is using.

It's sold on the television, given to babies to play with, and teens
who stick this MICROWAVE RADIO in their pocket
next to their sexual and elimination organs,
and sleep with it under their pillow.

Is it any wonder that colorectal cancer is on the rise in young people.
Just wait, because little girls are born with all the eggs they'll ever use for reproduction and
those eggs in their ovaries are now being subjected to 24/7 pulsed, modulated microwave
radiation.

It's becoming a REQUIRED device
if you want to travel, do banking, participate in some social media
platforms, to rent equipment at Home Depot, or even use a parking meter in St. Louis,
Missouri... YOU WILL NEED A CELL PHONE.

The government admitted they were reading your text message and would be deleting
messages that shared misinformation about COVID or the shots. They also notified you that they
were tracing your contacts with other people, and I still couldn't get anyone
to simply put their phone in a faraday bag or turn it off and wrap it in foil
as an act of resistance and sending a message to our overlords.

Nope!

During COVID, it was also being used to REQUIRE proof of vaccination status.
You couldn't enter some restaurants unless you had proof, you'd taken the "shot"... on your phone.
You can't use many payment processors unless you have a cell phone number.

You can't "buy or sell" without it!

Does this sound familiar?

Biblical even?

When the signs read "Chicago 30 miles"

"Chicago 10 miles"...

you shouldn't be surprised when you end up in Chicago!

Are you aware that the Nat'l Institutes of Health released an article showing

COVID-19 was connected to wireless radiation exposure?

The first link here is where you can see that article:

You can find that link on the NoATT.blog titled:

[NIH.gov COVID-19's Connection to Wireless Radiation Exposure](#)

And Wuhan, China had vaccinated their populace for the "flu" in right before they

Launched a reported 10,000 5G antennas.

CAN YOU SEE THAT THIS IS AN EXPERIMENT ON HUMANITY?

My experience makes it pretty hard to watch people wearing a mask

while they're carrying a microwave radio in their pocket.

Feeling like a stooge yet?

Are you aware the former CEO of Nokia stated that

"by 2030 you won't need to carry a phone, the phone will be in you".

Hello?

Are you aware that they can hook us up to "the Cloud" aka "The Internet of Things"

by accessing our energetic anatomy, without consent via low earth orbit satellites.

You need to learn about the Internet of Things (IoT)

and the Internet of Bodies (IoB).

NoATT.blog post COVID-19 category and the AI/Transhumanism categories

are where you'll find those posts.

One post titled: [Internet Of Body \(IoB\) Technology Explained-The Complete Takeover of](#)

[Humanity](#)

stresses this point!

Targeted Individuals

Are you aware that fellow Americans who file a complaint against a corporation, the government,

or speak out on social media, or email newspapers about issues of concern are being targeted

by technology? This is not just happening at the Cuban embassy in Havana!

It happened to me when I wrote 7 newspapers about what's going on here!
We were still in Austin, Texas and I suspect they used the neighbors' not smart electric meter to send a directed energy signal into our home for about 10 minutes that peaked out my RF meter.

Someone more in the know said, "They were trying to give you a heart attack".

The neighbor's meter was 25 yards from my bedroom.

If you go to NoATT.blog you'll find a "Targeted Individuals" category.

One post is titled, [Targeting Americans with Energy Weapons](#)

Now you might begin to understand why I am creating this off-the-beaten-path approach
to connect with my readers.

We have work to do that shouldn't be done on social media and there will come
a time when I'll need you to further identify yourself by joining as a subscriber and paying a small
monthly fee to weed out trolls or moles in the tribe who could work to thwart our efforts.

NoATT.blog has a featured post titled

Public Health Warning

<https://neighborsorganizingagainsttrespassingtechnology.blog/2023/04/18/public-health-warning-document-w-instructions-for-action/>

I created that document in the fall of 2022 after 7+ years of injury and
isolation from the world, to help you see what's being built around you,
and

being done to children in schools where no incident reports are allowed,...

page 17 or 18 is where you'll see

Events in schools with powerful Wifi routers.

Go to [TheTruthAboutTechnology.org](https://thetruthabouttechnology.org)

and see how modern technology is affecting our world.

Be sure to view the [IMAGES THAT TEACH](#) category on the site.

What I want you to see is how this is all leading us directly into an

AI/Transhuman agenda, quickly.

You, carrying a phone, and accepting all this technology, is saying

"Yes! I want to live and be controlled in a Dystopian Technocracy!"

At this link on the NoATT.blog site you'll see a post titled [Having a cell phone is saying YES to an AI world](#)

The **launch of 5G** is when I felt the first major shift here in the Ozarks in December of 2020.

They moved the satellite tv providers to the C band part of the EMR spectrum to accommodate 5G and for reasons I can't articulate it began sending a microwave reading through the hardwired satellite tv box that lit me up and maxed out the microwave/radio frequency meter.

We went w/o television for 5 months until I figured out the work-around.

Then, **Arkansas launched five new PBS transmitters in January of 2022**, bragging that they covered 95% of the state with electromagnetic radiation to accommodate home learning for COVID-19 where they also provided free Wifi Hotspot devices.

Of interest, that Hidden Dangers book revealed that the Supreme Court of Italy, in 2011, ordered Vatican Radio to pay 41 people who died of Leukemia and lived within 6 miles of their broadcast transmitter.

We live 15.6 miles from the nearest one and I woke up in severe vertigo upon launch!

Again, it was a past remedy I grabbed that stopped it immediately but I do wonder how the people in the 6-mile radius of these transmitter/repeaters are feeling.

How many went to the doctor sent home with a prescription drug?

And why is Arkansas allowed to do this without consent and when is a lawyer going to show up and stop this?

I think DOGE (Dept of Gov't Efficiency aka Elon Musk) is showing...

What happened to our safety oversight agencies and our judicial system...it's all been corrupted!

That's how corporations and government agencies get away with this?

They've been invaded by feckless stewards and the CCP!

According to the 4-min video at the link below we may be "being held hostage" by malware installed throughout our critical infrastructure.

<https://neighborsorganizingagainsttrespassingtechnology.blog/2025/01/15/so-china-has-malware-installed-in-all-of-our-critical-infrastructure-holding-us-hostage-per-christopher-wray-4-min-video/>

A little tidbit the mainstream news isn't likely to share with you
And yet another reason this is going to demand a WE THE PEOPLE response instead of sitting on
your hands and letting Trump and Elon or whoever, handle everything...MAYBE!

This is an American Disability Rights Discrimination action,
a product liability, property rights violation, personal injury, and fraud legal action against
ANSI who approved the meter system and the electric companies who are violating civil and
human rights not to mention moral code of "Do unto others as you'd have done unto you".
One lawyer in Australia has had success with a criminal assault charge to stop placement and
remove some towers but in the corrupted by corporations USA, I know of a man who spent
\$188,000 dollars trying to stop a digital electric meter and lost in federal court.

How did WE THE PEOPLE get here?

It was these questions that led to the awareness of
what happened to "Common Law" here in the USA.

Got to the NoATT.blog and find the category for The USA is a Corporation Issues to get
started down this road of discovery:

<https://neighborsorganizingagainsttrespassingtechnology.blog/2024/09/14/the-usa-d-c-is-a-foreign-corporation-99-of-us-dont-owe-income-taxes/>

Yes, we still need to talk about gamma or nuclear radiation.
For brevity let me just say that I saw Scott Adams, the creator of the Dilbert cartoon.
He said we have the technology to build a facility next to a leaking facility
that will absorb and neutralize leaking radiation and shut it down upon completion.

What I know is that answers only come when we walk towards the problem!

One last thing I want to share

You will learn in the book about this "gift" in healing acquired early in my journey!

I was chasing God for information by prayer, fasting, reading books that mattered, and changing my lifestyle to one of health as a means of honoring my body as a spiritual temple. It was hard but it made spiritual insights happen, so I kept doing it...more and more and more.

I didn't realize God was seeing these as **"acts of worship"** and this gift showed up!

He brought people and situations that allowed me to practice

and told me that it was more about teaching me than it was,

"Hey, I can heal you" thing so I didn't use it very often.

It was A TOOL in the toolbox that provided a few physics defying events and some quantum healing confirmations that helped me learn about frequency and our energetic anatomy.

It also revealed to me a deeply disturbing view of humans that I wasn't willing to facilitate...

self-indulgence to a point of offense.

They preferred their ignorance and lack of responsibility.

It was quite disappointing and resulted in my leaving organized religion.

I actually had hoped to teach others how to develop this gift as I believe this to be an innate skill, but the timing just never seemed right.

And every session didn't produce healing so, I had to figure out why and see the lesson being taught.

Most often, the issues were due to not only a lack of knowledge resulting in nutritional deficiencies, but also self-indulgence, entitlement, cultural conformity, preferences, and massive willful ignorance about what's in the grocery store these days presented as food.

I saw the need for a book, but I certainly didn't intend to write one.

I just stopped offering the healing work because the reality is,

if you sow the seeds of sickness and disease, sickness and disease will be the harvest.

Anyone offering health advice that doesn't also teach you isn't doing you any good but are mainly enriching themselves. Both parties need to be invested in a good outcome or it can feel like giving cpr to a corpse.

I did a few "Healing Prayer" sessions between 1990-2000 that were interesting, but that was about it.

Then in 2001 I was working on a fellow therapist when the gift spontaneously showed up.
I was practicing a new modality where my hands were still instead of moving with massage
strokes, and BAM,
so, I began exploring it a bit more and later learned to heal at a distance *without* the
participation of the recipient, at least on a conscious level.

One girl damaged by vaccines told her mom,
"I feel better when Ms. Kathy visits me in dreamland"
Though she had no awareness I was doing the work.

A baby started breathing on her own when her parents were told to
"Make the arrangements, we've done all we can".

You can see those stories and any screenshots at:

<https://gettingwellgodsway.com/category/client-healing-testimonials/>.

There's a few more but

the one that sends the loudest message to mankind is related to the technology issue!

A facebook "friend" read a post I shared about a healing session I did on someone and wrote me a pm telling me that she had a dear friend who was battling cancer and "if I feel inclined...it would be appreciated." I'd been up working very late on a new website and needed to defrag so I decided to at least initiate a connection with her (energetically or in the energetic realm) and then actually DO the session the next morning as I've learned when I do this I'm often met with a very willing subject at that later time. For clarity, I was in Austin, Texas and the woman with cancer was in California. I woke up the next morning and began the session and IMMEDIATELY began vibrating pretty radically and crying. I was clearly processing something pretty dramatic so I sent a pm to the woman and to Charlene so they'd have an explanation on their end.

I was excited to hear back from the woman that she was literally "vibrated awake".

She jumped up, threw up, and was apparently instantly healed.

I had no idea of the severity of her state when Charlene,
presented this opportunity. This woman was literally on her death bed.
What was unexpected was that Charlene also woke up vibrating radically.

I expect the death energy was soooooo strong that God had to spread it out to keep any one of us from having too vivid of an experience.

Christi "did laundry, danced to the radio, went for a walk,..." and thanked me profusely. She then went to Chicago to visit family for three weeks and wrote an amazing testimonial.

It truly looked like she was well.

Even Charlene, her friend, wrote "every time I see her, she looks healed".

You can see the related screenshots on the post

<https://gettingwellgodsway.com/2016/02/17/why-i-stopped-using-the-healing-prayer-gift-this-womans-miracle-ended-in-death-by-cell-tower/>

But then she returned home to California and started getting sick again and six months later she was dead leaving us with many questions.

In the meantime, I had an acute event when I touched the screen of Mom's phone in October of 2016 and was in a fight to survive and relocate.

It was my own injury that queued me in to the idea that there was some technology in her environment responsible for her death.

I reached out to Charlene with my idea, and she responded,

"You must be reading my mind. I even went over to her house to see, and she lived right by two towers. I even mentioned it to my mom."

That screenshot is there too.

You'll find other testimonials at the category for "Client & Healing Testimonials"

<https://gettingwellgodsway.com/category/client-healing-testimonials/>

Again, the doctors were subjecting this poor woman to toxic therapy with zero consideration for the health of her environment!

This is when I stopped doing the Healing Prayer!

There's no point in doing any kind of healing on people who are carrying around a device that's microwaving them, in their pocket no less, WIFI

and accepting towers and electric meters and watches and ear buds and...
that emit pulsed microwave radiation and dirty electricity,
while ignoring and mocking sound warnings and mitigation options.

**God taught me that "as a vessel of healing you are not to try harder than the person
who needs the healing...meet them according to their own efforts".**

I have found people unwilling to change their wireless habits so...I quit using the gift.

Seems clear to me that humanity has chosen manmade tech over God's gifts,
facilitating and allowing a toxic invader to their own detriment.

FYI, This is me, continuing my effort to wake you up!

For those who wonder, I was rarely paid for this work, which wasn't INSTANT very often.
I actually have to do a session, which typically lasts 2 hours, sometimes more than one session was
needed as we continue to live in a toxic world and embrace toxic habits.

I now realize if I charge several hundred dollars per session people might think twice about
wasting my time or God's and may in fact put their stupid devices in a bag and hardwire their
world and if they don't at least I was paid instead of being used and disregarded. This would allow
me to detach from the outcome. If I give you a car and you wreck it I'd likely be upset but if I
sell you a car and you wreck it...no skin off my nose as I'm not emotionally involved.

This kind of work should actually be thought of as one method of "health maintenance"
for your energetic anatomy but sadly many don't even know
they have this energetic anatomy system as part of their being.

They can accept wireless technology but not "wireless healing"

And are actually more comfortable popping a chemical pill they know nothing about
But it, and the practitioner dolling it out, don't mind if they continue in their detrimental habits.

A true vessel of healing does mind.

So What Am I Going to Do Now?

It's become too toxic for me here in the Arkansas Ozarks.

This is one reason

I decided not to spend time on a podcast last year and took some time to consider where my efforts would have the most impact.

I woke up in severe vertigo the morning of July 24th, 2024.

I was again able to put an immediate shielding remedy in place, but I've noticed in recent months that the air feels and sounds more electric here.

The squeal is definitely louder and I'm no longer willing to accept this.

I have no future here as I can't enter any buildings, go shopping, go to restaurants, friends' homes, and the most egregious,

I'm essentially blocked from access to any medical care which I find to be completely inhumane.

FYI there are only 8 low EMF hospitals in the entire world!

I live with my wonderful 89-yr-old mom and if/when she was to need medical intervention I won't even be able to enter the building with her.

I could ask people to turn off their cell phones and Wifi to allow me to enter for care, but I can do nothing to turn off the deadly not smart electric meters.

Sadly, the state of Arkansas, and two "Christian" governors, aren't interested in doing the right thing.

Thanksgiving of 2024 a facebook "friend" wrote me a pm telling about her visit to our area in an Airbnb cabin describing her horrifying experience electrically. She's been in southern Arkansas for a while with a friend who was passing away but has decided she wants to buy land and rent out some yurts here, so she went exploring for her possible location. Two weeks later I got yet another message describing yet another horrible experience and both times she was in the service area of Carroll Electric and within an hour of leaving the area, her dizziness, headache and ringing in the ears had stopped.

This made it very clear that this is in fact a TOXIC POCKET and helped

Me make a decision to use my time towards forming a safe haven community for

People with this condition and those who will honor our limitations,

For those who wonder solar isn't an option down in a hollow covered with dense forest so leaving seems the only option to get away from the tech insanity going on in this state plus they spray the Ozarks so much that it will shock you. I'm telling you EVIL IS PRESENT! Here's the link to my friend's private messages about her two visits here:

<https://neighborsorganizingagainstittrespassingtechnology.blog/2024/12/31/a-friend-visits-the-ozarks-spends-a-few-nights-in-hell/>

Can you imagine having this condition in today's world?

And the response of the culture is to buy the latest phone and offer little to no help!

"Hey, let's all call the governor on the same day and..." crickets

Post card mail-out efforts...more crickets

A few helped by sending money and a few passed out the Public Health Warning.

Not enough.

I'm not "quitting" but I am changing how I spend my time and releasing this book before I do.

I recognize that God often uses me to simply "deliver notice" and have done that here where there's a church every 1000 yards, but discernment and ability to respond is severely lacking.

I get it...electrical current actually anesthetizes the nervous system so you CAN'T respond but that doesn't mean we should just accept that and not do anything about it, so I continue to plead.

In hindsight I realize church attendance effectively outfitted me with a pacifier, put me in a tutu and sent me out on the battlefield ill-equipped for the actual battle at hand.

The consistent theme of my life is that God uses me to "deliver notice" giving "His people" an option to "do justly" or "do the right thing".

I see Him providing an option for people to

"turn away from serving evil"

by funding the harming of people and the environment through their consumerism.

And while professing "Christian" politicians and "stewards" attend church they apparently don't read their Bible.

...Amos 5: 23-24 reads,

"Away with your noisy hymns of praise!

I will not listen to the music of your harps.

Instead, I want to see a mighty flood of justice,
an endless river of righteous living."

**Going to church is a lazy man's path if they do nothing else to provide
justice and mercy in the world!**

It could even be a "condemned" man's path.

If stewards deny mercy and justice when they have the jurisdiction to act, and "have notice"
I doubt their church attendance or other do-good efforts will count for much.

Ultimately, I'm not responsible for the response or lack thereof and expect those He's had me
"notify" will be hearing from Him later on the issues presented.

Leaving the Ozarks would get me away from the PBS transmitters,
these toxic meters, and maybe fewer towers and

Now that 7 states have taken action to stop the spraying of their skies **MAYBE**
I can also get away from the near constant silver haze that is part of the recipe for destruction
and be allowed to have a true analog electric meter or perhaps one of many "free energy"
methods I've found to run our electrical needs without being killed off by the meter.

On NoATT.blog you'll find a category for CHEMTRAILS now.

One post is titled: [7 States Pushing to Stop Chemtrails](#)

Another important post to read there is titled:

<https://neighborsorganizingagainsttrespassingtechnology.blog/2024/01/17/wireless-tech-chemtrails-you/>

Since I have no future here in the Ozarks it makes sense to create a world where I do.

A fire pit, outdoor movie theatre, a large multi-use building, a stocked pond or lake,
community garden, community chickens, a teaching facility for speakers, a craft room,
and a community of people who understand and respect
the technology limitations of others will offer sanctuary, friendship,
and support for those who can't live in this modern world.

I can see the wisdom of creating a health clinic setup so we can receive services from local
practitioners such as massage therapy, dental care, chiropractic...

The idea at this time is a small, private effort, with a few proven friends but something

others can learn from and develop to any scale they like.

We'll see what happens as I move forward and announce this effort to attract other ideas and possible resources that can be presented.

Another recent idea came from watching YouTube videos...

Buying a dying or defunct town in the USA and setting it up as a SAFE ZONE.

No cell phone service = No Towers.

No WIFI...hardwired stations around town like the payphones used to be...

One Absolute: NO DRAMA!

For me, this move will mean 6 months of getting rid of things, prepacking and sorting, again and uprooting my 89-year-old mom. 😞

My current plan is to put this book out and start a podcast for the express purpose of attracting talent and resources to create this dream of a safe haven, NOT to teach people how to get well. I wrote a "dense and intense" book for that purpose, so I don't feel the need to also read it to an audience. The book is a paperback and for the best results it should be drug around with you, written in, and highlighted with lots of dog-eared pages.

I have the ability to build out a blog and start a membership community on the same platform where the book is offered but it makes sense to see what kind of feedback this effort generates.

If it's more crickets, then I can tell God, "I tried!"

If people start dropping to their knees again from reading that book, we'll follow that lead.

I have a vendor for 100% organic cotton t-shirts and hoodies, mugs... I can put a design on.

This software has all kinds of features but for now, if you're interested...

buy the book and see where that takes you/us.

I'll continue learning how to develop the site between the other tasks.

If you aren't clear, I'm not trying to sell a book and derive a financial legacy for my family.

I'm growing tired of being broke but I'm also a cheap keep as I'm not into clothes, jewelry, cars or travel...just trying to get my life purpose met before I go Home. My biggest expense are my nutritional supplements that have absolutely helped me navigate back to health.

I WANT to live a life surrounded by good souls, love, laughter, pain and support.

We can build something sweet in the presence of a bitter world.

Here's that HOW TO TAME YOUR WIRELESS WORLD post again so you can get started on that:

<https://neighborsorganizingagainsttrespassingtechnology.blog/2024/01/03/how-to-tame-your-wireless-world/>

If you've been cheering as you read, and want to be part of whatever gets created here,

Go to [ConfrontingTheCulture.com](https://confrontingtheculture.com) and subscribe to my emailed newsletters.

Please share the book, this site, the emails I send and encourage others to SIGN UP as it will help move these efforts forward and expand our reach.

Now is when the online trainers say,
I'm supposed to "try to run you off".

That's right.

In fact, I hesitated to share this next part and considered doing so in a later email but then saw the wisdom of sharing it now.

The truth is that I'd rather have 10 solid "I get it, how can I help" people on board than 100 people who want to see how I might entertain or bless them in some way.

It also hurts my platform when I send emails that aren't opened so inactive people will be removed over time.

I believe God is looking for a labor force to change the course we're on!

We have work to do if we hope to "save what remains".

Ultimately, I bring a message of hope!

It's wrapped in a bit of disturbing reality and a need to roll up your sleeves and get involved but HOPEFUL as we do.

I also live in a world of miracles.

If I'm doing what I'm supposed to be doing

I EXPECT GOD to show up and He has a pretty great track record thus far.

Maybe it will be through someone who reads this!

Before you place the order let me share some details:

Many of you recognize we're in an information war that is spiritual in nature.

For me this has resulted in Amazon doing a targeted hit on the book by

allowing 12, 1-star reviews,

all by non-verified purchasers, within a 24-hour period.

This was done one week before launching their Rx pill delivery service and mine wasn't the only book hit.

I put that story on the original book blog, GettingWellGodsWay.com:

[Amazon Targeted The Book.](#)

Three requests to have these fake reviews removed were denied so I pulled it from their site and took the opportunity to rebrand and retitle it for a broader audience and put it with a private printer and built a marketing site after a very smart niece read it and said, "You're an icon for the millennials and they don't even know you're on the planet. You need to fix that". I determined the church crowd had their chance to embrace it so it was time to bring it to a wider audience thus the new title, cover, website...

At this time, I'm the only place where you can obtain this book so please forward the emails I send with the people you think will enjoy it.

Then, Stripe (like PayPal) canceled my payment processing account after a recent radio interview, I gave with the host, John B. Wells, formerly of Coast to Coast AM Radio, a recognized name and a sizable show!

That information is also in the "Amazon Targeted the Book" post!

<https://gettingwellgodsway.com/2024/05/04/amazon-did-a-targeted-hit-on-my-book/>

Clearly it will take a concentrated effort to move forward and we'll have to use more covert channels so "hand to hand" and mouth to mouth is needed.

My safe technology activist efforts where I'm tattling on the state of Arkansas for their unconscionable antics is likely the impetus but I have to do what I have to do...

cuz I made a deal with God, right?

This has meant using a less familiar payment processor than Stripe or PayPal, but they're happy to have me and are a listed option by the software company so they certainly have met some criteria for that to happen.

GoCardless is the new payment processor.

They have a little different system that asks you to set up with basic information before it will ask for your card information.

I hope you'll find this book worthy of trudging into a bit of unfamiliar territory and

BE SURE to open the THANK YOU FOR YOUR ORDER page where you'll find a button that allows you to read that "dropped 'em to their knees" introduction and another button to Join the facebook page!

I launched the site on 08-08-24 and an introduction happened a week later that feels like the person and company I've been looking for, for 2 years.

Stay Tuned!

And remember...

"Have nothing to do with evil but rather, expose it." Ephesians 5: 11

In the meantime, be a blessing by putting your phone in a faraday bag (turned off or it will drain your battery) and use them only for emergencies and away from people and pets that you love! Recognize and act upon the reality that not smart watches and other devices also emit harmful radiation so please stop wearing them for your own safety as well as for others. This is exactly like teaching people not to smoke cigarettes around others except the entire world has now taken up smoking in public.

Please take this information to heart!

"Then if my people who are called by my name will humble themselves and pray and seek my face and turn from their wicked ways, I will hear from heaven and will forgive their sins and restore their land."

2 Chronicles 7: 14

In service,

Kathy

If you aren't tired of reading here's another post...Are the church folks a lost cause?

<https://gettingwellgodsway.com/2024/06/27/are-the-church-folks-a-lost-cause/>
