

# To My Local Quorum Court Members

---

My name is Robert Workman

I am a Certified Building Biologist, EMRS Specialist, and have over 200 hours working with a 40-year electrical engineer in advanced Pico Scope Spectrum Analyzers, and Oscilloscope training another word I can see the electrical pollution caused by Non-Linear Loads switch mode power supplies which will be used by the data centers.

Data centers will have 3000 to 4000 server which will have 3000 to 4000 switch mode power supplies. The conductive emissions from the switch mode power supplies will create conductive emissions which will get pushed back on the neutral, and the neutral and the ground are bonded together at each house at the panel so there will be elevated voltages on the ground because the neutral and ground is bonded in the panel. The transformer also has the same neutral, and ground which is bonded. The frequencies created from the switch mode power supplies will travel everywhere for about 10 miles in all directions. So once this happens, there is no way to attenuate this noise. So, now everybody will have to isolate themselves from the grid VIA inductors which will need which will be 11,000 per house. I predict everybody will get tinnitus and make the homes unlivable.

Will the data center be open or a closed system

Will the data center have its own power generated without connection to the public utility. So will the data center have a Big Enough Neutral, so the pollution will not be connected to the earth to flow back to the substation.

Can the applicant show they have followed a federal law NEPA to prove this will not pollute the environment and can they please provide anywhere in the United States after 5 years that a data center was built and safe from pollution.

If Lithium batteries are used can the applicant show a time test how long the lithium batteries last and what environmental protocol will be used after the batteries expire.

Let's make the Applicant responsible to prove the pollution will not be connected to the public electrical grid since it already overloaded since the neutral is not big enough to handle the public pollution back to the substation.

Applicants must set aside a slush fund of 10 million, and the applicant will be held personally responsible for any future data center pollution or disaster.

How much Gigawatts (GW) per day is the data center expected to consume.

What kill switch will the public have if the data center overloads the electrical grid

**What upsets me is that we have people sitting on “boards” and county commissions that know little to nothing about the things they are approving to be built. Most of them haven’t read a book that mattered since high school so how are they qualified to be making these decisions?**

**Below you’ll see some graphics that show where this has taken us!**

When I first got zapped by a new cell phone in 2016, every time I explained it to friends and family for 6 months I would get nauseated and hear this statement.

IT WAS NOT MY OWN VOICE!

**"You have no idea what you're  
doing to the children.  
YOU HAVE NO IDEA!"**

To see adults using cell phones in the car with kiddos is deeply disturbing to me BECAUSE this warning message came through my soul. It's embedded in me so I can't ignore it or forget it. To see it go on with neuro injured kids is even more unsettling. If I'm not yelling at you, it's not because it isn't warranted. I'm showing restraint.

Turn it off, put it in a faraday bag or wrap it in foil, only use it for emergencies, and help me get these towers pushed back!

Stop watching me and GET INVOLVED!

### Cell Towers Maiming and Killing Animals!

MARCH 1, 2024 · EDIT

humans should be disgusted and take immediate action!

<https://tinyurl.com/2xskhvve>

I feel bad for thinking humans are dumber since tech came around but then I see this and feel perfectly justified!

Put your phone down and read books that matter.

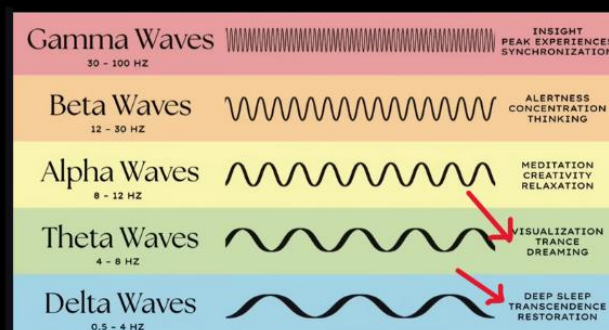

[ConfrontingTheCulture.com](http://ConfrontingTheCulture.com)

Watching a Netflix documentary, *Weed The People*,  
about babies with terminal cancer being given THC extracts.  
What was disturbing is the number of cell phones around them!  
That likely means Wifi and a not smart electric meter on the home, daycare...  
and a cell tower (or 10) down the street!  
So are we just going to ignore this reality so you can keep your phones  
and not have to take action to help those of us trying to warn you?

"There is a high likelihood that most of the twentieth century 'disease of civilization,' including cardiovascular disease, malignant neoplasms (cancer) diabetes, and suicide, are not caused by lifestyle alone, but by certain physical aspects of electricity itself. The data to prove this has been available since 1930, but no one investigated it. Consequently, the 'wars' on cancer and cardiovascular diseases are doomed to failure, because a critical etiologic factor has not been recognized. What's more, these very disease are now increasing in the population in direct proportion to our increasing exposures to high-technology electrical devices. The electrical part of this story begins with childhood leukemia..."

Technology (wireless+) almost killed me and that opened my eyes to the world being constructed around us, what was becoming of us, how it's affecting the environment and literally torturing wildlife, our children, causing cancer even in our pets, amplifying metals, chemicals, emotions, violence, massive health problems, empowering evil people and agendas, allowing fellow humans to be driven from homes, tortured with silent weapons and leading us directly into an AI surveilled communism, being used to burn out entire areas...HELLO?

What the hell is it going to take before YOU get engaged?

*"We must understand what is at stake: absolute global control via digital and wireless systems, and widespread planetary destruction. If we refuse to give up our cellphones (and revert to wired systems that provide the benefits without the deadly downsides), we remain trapped in the net and will soon be irrevocably ensnared, with digital IDs, biometric bracelets, non-stop surveillance and wireless control of our bodies, minds, bank accounts and lives."*

## Did wireless radiation kill our son and our dog?

DECEMBER 5, 2020 ~ EDIT

Did you know that our dog Leia died from cancer 6 months before we found out about Justis' deadly brain tumor?

Leia had a tumor the size of a baseball in her head which is visible in these photos taken just before she passed. She spent most of her time with Justis in his room while he played video games and streamed his favorite shows. Justis was only 4 when we got Leia and they were such close friends.
